<u>Photo Size</u>	<u>Download Time</u>
4x6	2 to 3 minutes
5x7	3 to 5 minutes
8x10	8 to 15 minutes

Note: Download times are using a 28.8 K modem. Cable and DSL users will have negligible download times. If you know that a majority of your guest will not have high speed internet access, you may want to keep your high resolution photo downloads to the 5x7 or 4x6 sizes.

Captions for Photos:

If you request captions, we will email you a user ID and password once your site is completed. You can then login and enter your captions manually for each photo. Otherwise you must submit a list of the photo file names and captions you wish to appear (31 character max).

** The high resolution downloads will not have any borders, frames, vignette, or paper backgrounds. This is often the preferred method for your guest to print their own copies that they can frame. All web photos will be 72 dpi (dots per inch) except for the high resolution downloads which will remain at the maximum dpi at which they were received (the higher the dpi you submit, the better high resolution the prints will be).
